Wetlands & Wildlife Conservation. Be A Friend To Frogs - And Other Wildlife. In 1995 a group of school kids and their teacher noticed a high incidence of malformed frogs in an area of Minnesota and decided they wanted answers! What followed was a collaboration between kids, scientists, and other community members to survey the scope of the situation and find the source of the problem.

Habitat Animal Printouts. The Earth has many different environments, varying in temperature, moisture, light, and many other factors. Each of these habitats has distinct life forms living in it, forming complex communities of interdependent organisms. A complex community of plants and animals in a region and a climate is called a biome.

A. Breeding bitterns became extinct in the UK by 1886 but, following re-colonisation early last century, numbers rose to a peak of about 70 booming (singing) males in the 1950s, falling to fewer than 20 by the 1990s. In the late 1980s it was clear that the bittern was in trouble, but there was little information on which to base recovery actions. B. Bitterns have cryptic plumage and a shy ...

Genetically modified food controversies are disputes over the use of foods and other goods derived from genetically modified crops instead of conventional crops, and other uses of genetic engineering in food production. The disputes involve consumers, farmers, biotechnology companies, governmental regulators, non-governmental organizations, and scientists.

### **Genetically modified food controversies - Wikipedia**

The loss of biodiversity is increasing. There is massive extinction from human activity. For example, fish stocks are dwindling, forest loss is resulting in the loss of many species, land and other resources are being misused, leading to various long terms costs.

### **Loss of Biodiversity and Extinctions — Global Issues**

Spring rains come with unexpected quantities and force, causing significant amounts of soil erosion to unprotected cropland. Spring is the most critical time for soil erosion because of degraded crop residue, tillage in preparation for planting, and lack of crop canopy.
