Heredity is the passing on of traits from parents to their offspring, either through asexual reproduction or sexual reproduction, the offspring cells or organisms acquire the genetic information of their parents. Through heredity, variations between individuals can accumulate and cause species to evolve by natural selection. The study of heredity in biology is genetics

Heredity - Wikipedia

The theories developed in the early 20th century to integrate Mendelian genetics with Darwinian evolution are called the modern synthesis, a term introduced by Julian Huxley.. Evolutionary biologists have subsequently modified this concept, such as George C. Williams' gene-centric view of evolution. He proposed an evolutionary concept of the gene as a unit of natural selection with the ...

This article directly addresses the scientific evidences in favor of macroevolutionary theory and common descent. It is specifically intended for those who are scientifically minded but, for one reason or another, have come to believe that macroevolutionary theory explains little, makes few or no testable predictions, or cannot be falsified.

29+ Evidences for Macroevolution: Part 1 - TalkOrigins Archive

"Adam lived 930 years and then he died." The mere assertion that humans could live more than 900 years-as Genesis 5:5 states-seems, for many people, nothing short of absurdity. The mention of long life spans in Genesis 5 hinders these people from openly exploring the Christian faith. Unable to ...

Long Life Spans: "Adam Lived 930 Years and Then He Died"

Background. Realism in the last half of the 19 th-century began as an experiment to make theater more useful to society.The mainstream theatre from 1859 to 1900 was still bound up in melodramas, spectacle plays (disasters, etc.), comic operas, and vaudevilles.

Introduction to Theatre -- Realism
