Presentation Description . Fear & Greed are powerful emotions, driving large stock market swings

as investors react. Torn between emotion and logic when making decisions, each of us reason differently under pressure or high risk.

Metropolitan DC Chapter AAll

In statistics, a full factorial experiment is an experiment whose design consists of two or more factors, each with discrete possible values or "levels", and whose experimental units take on all possible combinations of these levels across all such factors. A full factorial design may also be called a fully crossed design. Such an experiment allows the investigator to study the effect of each ...
