Mammal, (class Mammalia), any member of the group of vertebrate animals in which the young are nourished with milk from special mammary glands of the mother. In addition to these characteristic milk glands, mammals are distinguished by several other unique features. Hair is a typical mammalian feature, although in many whales it has disappeared except in the fetal stage.

The evolution of mammals has passed through many stages since the first appearance of their synapsid ancestors in the Pennsylvanian sub-period of the late Carboniferous period. By the mid-Triassic, there were many synapsid species that looked like mammals. The lineage leading to today's mammals split up in the Jurassic; synapsids from this period include Dryolestes, more closely related to ...

An extinction event (also known as a mass extinction or biotic crisis) is a widespread and rapid decrease in the biodiversity on Earth. Such an event is identified by a sharp change in the diversity and abundance of multicellular organisms. It occurs when the rate of extinction increases with respect to the rate of speciation. Estimates of the number of major mass extinctions in the last 540 ...

L'okapi (*Okapia johnstoni* P. L. Sclater, 1901) è un mammifero artiodattilo giraffide originario del settore nord-orientale della Repubblica Democratica del Congo in Africa centrale. Nonostante presenti una serie di striature che ricordano molto quelle delle zebre, è più strettamente imparentato con le giraffe. L'okapi e la giraffa sono le uniche specie viventi della famiglia dei Giraffidi.
