The giraffe (*Giraffa*) is a genus of African even-toed ungulate mammals, the tallest living terrestrial animals and the largest ruminants. Taxonomic classifications of one to eight extant giraffe species have been described, based upon research into the mitochondrial and nuclear DNA, as well as morphological measurements of *Giraffa*, but the International Union for Conservation of Nature ...

Giraffe - Wikipedia

Catalase. Hydrogen peroxide (H_2O_2) is a common by-product of metabolic reactions. In high concentration it is toxic; therefore, its accumulation in cells would be harmful. Most tissues, however, contain the enzyme catalase, which catalyzes the breakdown of peroxide to water and oxygen as follows:

Enzyme Lab - Ex. 4 - Kean University

The four major functions of the cardiovascular system are: 1. To transport nutrients, gases and waste products around the body 2. To protect the body from infection and blood loss 3. To help the body maintain a constant body temperature ('thermoregulation') 4. To help maintain fluid balance within the body. 1. Transportation of nutrients, gases and waste products

Quick Search Help. Quick search helps you quickly navigate to a particular category. It searches only titles, inclusions and the index and it works by starting to search as you type and provide you options in a dynamic dropdown list.. You may use this feature by simply typing the keywords that you're looking for and clicking on one of the items that appear in the dropdown list.

ICD-10 Version:2016 - World Health Organization

Bird anatomy, or the physiological structure of birds' bodies, shows many unique adaptations, mostly aiding flight. Birds have a light skeletal system and light but powerful musculature which, along with circulatory and respiratory systems capable of very high metabolic rates and oxygen supply, permit the bird to fly. The development of a beak has led to evolution of a specially adapted
