3302 Blood & Lymphatic system

lymphatic system doesn't have a pump to move lymph along. Instead, lymph vessels have valves, similar to the valves in large veins, that pre-vent lymph from flowing backward. Pressure on lymph vessels from surrounding skeletal muscles helps move lymph through the system into larger and larger ducts. These ducts return lymph to the blood 2. (

Blood and the LESSON 33.2 Getting Started Lymphatic System

The Lymphatic System The lymphatic system is a network of vessels, nodes, and organs that collects the fluid that leaves the capillaries, "screens" it for microorganisms, and returns it to the circulatory system.
