science courseware virtual earthquake answers - Bing

virtual Earthquake, environmental science assignment help In this activity, you will be going to the "Virtual Earthquake" website where you will be doing a series of guided tasks related to locating the epicenter and determining the magnitude of an earthquake.

virtual Earthquake, environmental science assignment help ...

Scroll down to the bottom of the page and click on Execute Virtual Earthquake. Read the information carefully and answer the following questions. Why do earthquakes occur? Where, in general, do most earthquakes occur? What do you call the point of origin of a seismic wave?

Virtual Earthquake Lab - owen.k12.ky.us

Click on Virtual Earthquake. DO NOT CLICK ON EARTHQUAKE! ... submit your answers. The three lines should intersect each other on the middle graph. This is the magnitude of the earthquake. 1. What magnitude did you get? ____ Put your answer in the box and Confirm it. 3. What was the name of the earthquake you calculated? ____ ...

Virtual Earthquake Lab - Flagstaff Unified School District

At the bottom of the page, choose Execute Virtual Earthquake, be sure to choose "San Francisco area" earthquake, and follow the directions for locating an earthquake and determining its magnitude. At the end, print your certificate of completion along with its associated table showing your calculations.

Question: Go to the web site www.sciencecourseware.com ...

An earthquake is a sudden release of stored energy that built up over time as a result of tectonic forces within the Earth. When one side of a fault moves rapidly relative to the other side of the fault, the sudden motion causes shock or seismic waves that travel through the Earth and produce

Example Answers - TeachEngineering

Earthquakes occur because of a sudden release of stored energy. This energy has built up over long periods of time as a result of tectonic forces within the earth. Most earthquakes take place along faults in the upper 25 miles of the earth's surface when one side rapidly moves relative to the other side of the fault.

Geology 101 LAB: Earthquakes. For this assignment, you will need some colored pencils -- red, ... Virtual Earthquake, ... and a table with information on earthquakes, and answer questions about earthquakes around the world in terms of plate tectonics.

Geology 101 Lab: Earthquakes - Wenatchee Valley College

There are two parts to the earthquake lab: (1) Virtual Earthquake, an exercise in reading seismograms to measure the timeline between P and S waves and in assessing seismic wave amplitudes, which combined with distance to the epicenter provide a measure of the magnitude of an earthquake and (2) analyzing recent earthquakes to study correlations between earthquakes and plate boundaries.

Lab--Earthquakes - Wenatchee Valley College

Best Answer: #1 is 35 km 345 #2 is 39 km 384 #3 is 61 km 594 This is the correct data now from here when you measure and answer the questions you will do just fine. Thankyou for showing me this, I find it very interesting.

help me answer this about determining earthquake epicenter ...

Students study how geology relates to the frequency of large-magnitude earthquakes in Japan. Using the online resources provided through the Earthquakes Living Lab, students investigate reasons why large earthquakes occur in this region, drawing conclusions from tectonic plate structures and the locations of fault lines.

Earthquakes Living Lab: Geology and Earthquakes in Japan ...

Virtual Earthquake shows the recordings of an earthquake's seismic waves detected by instruments far away from the earthquake. The instrument recording the seismic waves is called a seismograph and the recording is a seismogram. The point of origin of an earthquake is called its focus and the point on the earth's surface directly above the focus is the epicenter. You are to locate the epicenter of an earthquake by making simple measurements on three seismograms that are generated by the ...

Virtual Earthquake - SERC

Answer the following questions, and record your data on the computer and on this worksheet. Please note: You MUST make your measurements very CAREFULLY to receive a certificate at the end of this activity. When you have finished reading the introduction, click on the "Execute Virtual Earthquake" button at the bottom of the screen. Page 1 of 12
