Hello Wi-Fi Peeps! The question comes up from time to time about using a Mac Book Pro OSX for real-time video. While it can be done and works well most of the time in a stationary fashion you need to be aware of what limitations you should expect, especially if you are using enterprise grade security.

my80211.com - HOME

you can replace code at runtime by the use of LD_PRELOAD (@windows you can use a similar technique called detours, quite fancy). what this does is to inform the dynamic linker to first load all libs into the process you want to run and then add some more ontop of it. you normally use it like this: % LD_PRELOAD=./mylib.so ls and by that you change what ls does.
