The MSDN article has pretty detailed information about this.. From that the answers to your questions are: Q1: You should set the Unattended Execution Account if you don't want to set credentials for data sources and want the data source to work even when users are not able to enter their credentials (subscriptions or other scheduled executions.) From the linked MSDN article:

Unattended Execution Account in SSRS - Stack Overflow

I've been trying to install Notepad++ version 7.5.6 on numerous remote servers completely unattended. I've researched and found the silent switch '/S' but it doesn't work as I intended in my local environment. When I run the following code, it still generates a popup for the language, just as if I had clicked on the installer manually.

powershell - Unattended/Silent Install Notepad++ - Stack ...

Index numbers for [GuiUnattended]/TimeZone. The answer file uses a parameter named TimeZone in the [GuiUnattended] section to set the computer's time zone. The value of this parameter is an "index" which does not correspond to anything else on earth, as far as I can tell.

I don't have and can't install NSS on my computer here but this may be able to do what you want. It's pretty powerful and has done wonders for me.

[SOLVED] Office O365 Silent Unattended Install - Spiceworks

Installation (or setup) of a computer program (including device drivers and plugins), is the act of making the program ready for execution. Because the process varies for each program and each computer, programs (including operating systems) often come with an installer, a specialized program responsible for doing whatever is needed (see below) for their installation.
