Algebra Help - Lessons, examples, practice questions and other resources in algebra for learning and teaching algebra, How to solve equations and inequalities, How to solve different types of algebra word problems, Rational expressions, examples with step by step solutions

Algebra Help (solutions, examples, videos)

Students work through the various set builder problems while I circulate and gather interesting algorithms and common misconceptions. I ask that they not only answer the set builder questions by circling the correct choice, but that they also list out all possible values for x in each scenario. I find this to be very important for the summary. Set Builder Template.docx

Eighth grade Lesson Set Builder Notation | BetterLesson

Build your own polygon and transform it in the Cartesian coordinate system. Experiment with reflections across any line, revolving around any line (which yields a 3-D image), rotations about any point, and translations in any direction.
