A dichotomous key is a tool created by scientists to help scientists and laypeople identify objects and organisms. Typically, a dichotomous key for identifying a particular type of object consists of a specific series of questions. When one question is answered, the key directs the user as to what question to ask next.

1. Different families: There are three groups (families) of crocodilians: the alligatoridae, which includes the alligator and the caimans; the crocodylidae, which includes the "true" crocodiles; and the gavialidae, which contains only the gharial. So, the first difference is that alligators and crocodiles are actually in different families. 2. Shape of the jaw: The easiest way of telling apart ...

The tree of life or universal tree of life is a metaphor, model and research tool used to explore the evolution of life and describe the relationships between organisms, both living and extinct, as described in a famous passage in Charles Darwin's On the Origin of Species (1859).. The affinities of all the beings of the same class have sometimes been represented by a great tree.
