In modern mathematics, the presentation through vector spaces is generally preferred, since it is more synthetic, more general (not limited to the finite-dimensional case), and conceptually simpler, although more abstract.. A vector space over a field F (often the field of the real numbers ...

In mathematics, a matrix (plural: matrices) is a rectangular array of numbers, symbols, or expressions, arranged in rows and columns. For example, the dimensions of the matrix below are 2×3 (read "two by three"), because there are two rows and three columns: $\begin{bmatrix} - & - \end{bmatrix}$. Provided that they have the same size (each matrix has the same number of rows and the same number of columns as the other ...
