The dependent variables were drawn from two sets of questions. While this study only reports information from respondents in the United States, an 11-point scale was used to facilitate international implementation of the survey (Calantone et al., 1996). The first set of 10 questions asked the respondents to assess the impact of environmental activities on various dimensions of the firm (0 ...

A honey bee (or honeybee) is a eusocial, flying insect within the genus *Apis* of the bee clade. They are known for construction of perennial, colonial nests from wax, for the large size of their colonies, and for their surplus production and storage of honey, distinguishing their hives as a prized foraging target of many animals, including honey badgers, bears and human hunter-gatherers.

Honey bee - Wikipedia

People are interested in California water problems, and they ask reasonable questions. Here is a first installment of short science-based answers to some reasonable questions often heard at public and private discussions of water in California.

Text mining is an emerging topic that advances the review of academic literature. This paper

presents a preliminary study on how to review solar irradiance and photovoltaic (PV) power forecasting (both topics combined as “solar forecasting” for short) using text mining, which serves as the first part of a forthcoming series of text mining applications in solar forecasting.

As an amusing side note, in a science essay called "The Sight Of Home" Isaac Asimov once calculated how far an interstellar colony would have to be from Terra before Sol was too dim to be seen in the colony's night sky with the naked eye. Turns out that colonies further than 20 parsecs (65 light-years) cannot see Mankind's Homestar, because Sol's apparent magnitude is dimmer than 6.
