The expansion and development of geometry through Islamic art and architecture can be related to the significant growth of science and technology in the Middle East, Iran, and Central Asia during the 8th and 9th centuries; such progress was prompted by translations of ancient texts from languages such as Greek and Sanskrit (Turner, 1997). By the 10th century, original Muslim contributions to ...

Evolution is change in the heritable characteristics of biological populations over successive generations. These characteristics are the expressions of genes that are passed on from parent to offspring during reproduction. Different characteristics tend to exist within any given population as a result of mutation, genetic recombination and other sources of genetic variation.

Background Islamic decoration. Islamic art mostly avoids figurative images to avoid becoming objects of worship. This aniconism in Islamic culture caused artists to explore non-figural art, and created a general aesthetic shift toward mathematically-based decoration. The Islamic geometric patterns derived from simpler designs used in earlier cultures: Greek, Roman, and Sasanian.

My book, Encyclopedia of Chart Patterns is to human anatomy as Chart Patterns: After the Buy is to human behavior. Chart Patterns: After the Buy shows how a stock acts after a chart pattern appears, so we can use that knowledge before buying to boost the odds of trading success. It covers chart patterns, but from a different perspective than all of my other books.
