Marine biology is the scientific study of marine life, organisms in the sea. Given that in biology many phyla, families and genera have some species that live in the sea and others that live on land, marine biology classifies species based on the environment rather than on taxonomy.. A large proportion of all life on Earth lives in the ocean. The exact size of this large proportion is unknown

A hydrothermal vent is a fissure on the seafloor from which geothermally heated water issues. Hydrothermal vents are commonly found near volcanically active places, areas where tectonic plates are moving apart at spreading centers, ocean basins, and hotspots. Hydrothermal deposits are rocks and mineral ore deposits formed by the action of hydrothermal vents.

1. Introduction. Biological control is a cornerstone of Integrated Pest Management (IPM) and plays an important role in the sustainable and economic suppression of arthropod pest populations (Bale et al., 2008, Naranjo et al., 2015). The global value of biological control (trophic regulation of populations) has been estimated at \$617/ha (2018 dollars) (Constanza et al., 1997).
