In this section we will define radical notation and relate radicals to rational exponents. We will also
give the properties of radicals and some of the common mistakes students often make with
radicals. We will also define simplified radical form and show how to rationalize the denominator.

Finding roots of a quintic equation. Finding the roots of a given polynomial has been a prominent
mathematical problem. Solving linear, quadratic, cubic and quartic equations by factorization into
radicals can always be done, no matter whether the roots are rational or irrational, real or complex;
there are formulae that yield the required solutions. . However, there is no algebraic expression ...

The rate law or rate equation for a chemical reaction is an equation that links the reaction rate with the concentrations or pressures of the reactants and constant parameters (normally rate coefficients and partial reaction orders). For many reactions the rate is given by a power law such as $\text{rate} = k[A]^m[B]^n$ where $[A]$ and $[B]$ express the concentration of the species A and B (usually in moles per liter ...
