Calculating the Oxygen Diffusion Coefficient in Water Tom Richard. This discussion is part of a section on oxygen transport and oxygen diffusion in compost, which provides background on the general concepts and equations.. Estimates of the diffusion coefficient in liquids often use a correlation developed by Wilke and Chang, 1955, which is based on the Stokes-Einstein equation:

Countercurrent exchange is a mechanism occurring in nature and mimicked in industry and engineering, in which there is a crossover of some property, usually heat or some chemical, between two flowing bodies flowing in opposite directions to each other. The flowing bodies can be liquids, gases, or even solid powders, or any combination of those. For example, in a distillation column, the vapors ...
