Oracle VM VirtualBox can display virtual machines remotely, meaning that a virtual machine can execute on one computer even though the machine will be displayed on a second computer, and the machine will be controlled from there as well, as if the virtual machine was running on that second computer.

Chapter 7. Remote Virtual Machines - Oracle VM VirtualBox

Test files. The highest-level structure of tests is the file. Each file should contain a single context() call that provides a brief description of its contents. Just like the files in the R/ directory, you are free to organise your tests any way that you like. But again, the two extremes are clearly bad (all tests in one file, one file per test).
