### **What Does A Solution Architect**

The solution architect is concerned about the technical decisions being made regarding the solution and how they impact the business outcomes. Most of my focus tends to be on weeding out and addressing the non functional aspects of the solution or identify requirements that require some big choices to be made about the technology being used (otherwise known as the architecturally significant requirements).

### **What the heck does a solution architect do anyway? - Equinox**

What is a Solution Architect? A solution architect is responsible for the design of one or more applications or services within an organization, and is typically part of a solution development team. He or she must have a balanced mix of technical and business skills, and will often work with an enterprise architect for strategic direction. The main focus is on the technical decisions being made regarding the solution and how they impact the business outcomes.

### **What does a solution architect do? - CareerExplorer**

Solution architecture is a practice of designing, describing, and managing the solution engineering in relation to specific business problems. A solution architect is the person in charge of leading the practice and introducing the overall technical vision for a particular solution.
