Ego psychology is a school of psychoanalysis rooted in Sigmund Freud's structural id-ego-superego model of the mind.. An individual interacts with the external world as well as responds to internal forces. Many psychoanalysts use a theoretical construct called the ego to explain how that is done through various ego functions. Adherents of ego psychology focus on the ego's normal and ...

Accommodation, on the other hand, involves actually changing your existing knowledge of a topic. This is like buying a new book, realizing it doesn't fit in any of your existing bookshelves, and buying a whole new shelving unit to store all of your books in.

### **Understanding Accommodation in Psychology**

Sometimes, a person might not be aware of the lie because he/she has always believed it to be true. For example, the trainer of the famous horse "Clever Hans" did not know that the horse was responding to subtle clues from him, such as change in body posture, rather than performing complex arithmetic, and so he'd believed throughout that the horse was, in fact, truly gifted.

1. Adlerian Contribution to Contemporary Practice Question from Gil Levin (BOL): Alfred Adler's name is better known to today's therapists than are his ideas and methods. Your dedication to this body of work must be based on the belief that contemporary practice is diminished because Adler's contributions are not fully enough understood or used currently.
