Reteaching. 6-3. Two radical expressions are like radicals if they have the same index and the same radicand. Compare radical expressions to the terms in a polynomial expression. Like terms: 34. $x \cdot 11x \cdot 3$. The power and the variable are the same Unlike terms: 34. $y \cdot 211x \cdot 3$ 4. y . Either the power or the variable are not the same.

Dividing Radical Expressions. A common way of dividing the radical expression is to have the denominator that contain no radicals. Dividing radical is based on rationalizing the denominator. Rationalizing is the process of starting with a fraction containing a radical in its denominator and determining fraction with no radical in its denominator.
