In this lab experiement there is a competition for resources among members of two different species; Paramecium caudatum and Paramecium aurelia, places limits on the overall population size that could ever exist.

### **Population Biology Report[1] | Organisms | Earth & Life ...**

Dynamic Change. Like the individual organism, the population is a real and functional unit in biology. Defined as groups of organisms that are genetically and spatially distinct from other such groups, the population is the fundamental unit of evolution. Populations are dynamic, they grow, decline, colonize new populations, and go extinct.
