Urine is the product of the kidneys, which is produced to eliminate the waste products of metabolism, manage body fluid balance, & maintain acid-base balance. The blood is first filtered by the kidneys, and the composition of the resulting fluid is then altered depending on the body's needs. It is composed of mostly water, and breakdown products from blood cells impart the yellow color (urobilin).

Urine - Doctor answers - HealthTap

If you've had two or more culture-documented bladder infections during a six-month period, consider seeing a urologist — a doctor who specializes in diagnosing and treating urinary tract diseases.

Chronic bladder infection: Is there a cure? - Mayo Clinic
