Literature Evaluation. In clinical practice, pharmacists and APRNs should be able to use and evaluate a variety of literature types including tertiary (drug information resources, textbooks), secondary (newsletters, MEDLINE database), and primary literature (published clinical studies).

Module 6. Practicing Evidence-Based Medicine

The line bar = foo does not copy the contents of the variable, only its "object reference". To understand what is going on here, we need to know how lists are stored in the computer's memory. In 4.1, we see that a list foo is a reference to an object stored at location 3133 (which is itself a series of pointers to other locations holding strings). When we assign bar = foo, it is just the ...

If method is none, then that's all there is.If method is const or linear, the time-weighted series of values is taken into account instead.The weight is the timespan between two subsequent updates. With the const method, the value is the value of the reading at the beginning of the timespan; with the linear method, the value is the arithmetic average of the values at the beginning and the end ...
