Most people have no idea that their water heater is about to fail. But there are signs to watch for (and we're not just talking about sopping carpet or water running from under the garage).

4 Signs Your Water Heater Is About to Fail | Angie's List

If left untreated, a plumbing leak can cause damage to your walls. When pipes running behind walls burst or begin to leak, they moisten the drywall; eventually, this moisture makes its way through the walls and produces wet spots.. If you notice persistent wetness or a musty smell, you may have a leak.
