Most of the time when someone says "word problems" there is automatic panic. But word problems do not have to be the worst part of a math class.

Translating Word Problems into Equations - AlgebraLAB

It is the same when we multiply binomials! Instead of Alice and Betty, let's just use a and b, and Charles and David can be c and d:. We can multiply them in any order so long as each of the first two terms gets multiplied by each of the second two terms.. But there is a handy way to help us remember to multiply each term called "FOIL".It stands for "Firsts, Outers, Inners, Lasts":

Math 101: College Algebra Course - Online Video Lessons ...

The mean is found by adding the 15 numbers together which gives 357. Now take 357 and divide it by 15. This gives the value for the mean to be 23. 8. To find the median, we have to make sure that the data set is in order. This data is already in order so we can proceed directly to finding the middle value. In a data set with 15 numbers, the median will be the 8th value.
