Circuits and Symbols Electricity flows through circuits: paths of conductors (usually wires). Any break in the circuit will cause the circuit to fail, just like a break in a pipe lets water leak out of a water system. A closed circuit has no breaks: the light lights up. An open circuit has a break in it: the light will not light up. Circuit ...

Circuits and Symbols Electricity flows through closed circuits: paths of conductors (usually wires). Any break in the circuit will cause the circuit to stop, just like a break in a pipe lets water leak out. Electricity works a lot like water. Often imagining how water would work in an circuit will tell you how electricity will work as well.
