### Integrated Taxonomic Information System

Biological classification is how biologists group organisms.. The classification has its root in the work of Aristotle who invented a multi-ranked system. A great influence was Carolus Linnaeus, who popularized the idea of binomial nomenclature using a two-part name indicating the genus, and the species. The human species is named *Homo sapiens*. Names of species are often printed in italics ...

### Biological classification - Simple English Wikipedia, the ...

A fungus (plural: fungi or funguses) is any member of the group of eukaryotic organisms that includes microorganisms such as yeasts and molds, as well as the more familiar mushrooms. These organisms are classified as a kingdom, fungi, which is separate from the other eukaryotic life kingdoms of plants and animals.. A characteristic that places fungi in a different kingdom from plants, bacteria ...

### Fungus - Wikipedia

A mushroom, or toadstool, is the fleshy, spore-bearing fruiting body of a fungus, typically produced above ground on soil or on its food source.. The standard for the name "mushroom" is the cultivated white button mushroom, *Agaricus bisporus*; hence the word "mushroom" is most often applied to those fungi (Basidiomycota, Agaricomycetes) that have a stem (), a cap (), and gills (lamellae, sing).

Classification \* copyright cmassengale \* Growth, with increases in size and number of cells, is part of development. Development involves many stages from conception until death.

### Chapter 18 Classification - Biology Junction

Taxonomy Definition. Taxonomy is the branch of biology that classifies all living things. It was developed by the Swedish botanist Carolus Linnaeus, who lived during the 18 th Century, and his system of classification is still used today. Linnaeus invented binomial nomenclature, the system of giving each type of organism a genus and species name. He also developed a classification system ...
