World Rainforests Questions And Answers

Palm oil plays a decisive role in the lives of almost everyone of us. Being a low-cost resource, palm oil is in great demand and is contained in virtually everything. You can find it in foods ranging from frozen pizza to chocolate bars, in laundry detergents and cleaning agents, in cosmetics, in diesel fuel tanks and in combined heat and power plants.

Questions and answers about palm oil - Rainforest Rescue

The Wildlife Conservation Society (WCS) report "State of the Wild - a Global Portrait" contains a list of animals most threatened by extinction. The critically endangered Cuban crocodile, for example, can only be found in two small habitats in Cuba. The vaquita, a small porpoise endemic to the northern Gulf of California, is also extremely rare - as of 2014, less than 100 individuals ...

Which climate has grasslands that are ... - answers.com

Tropical rainforests are found near the equator due to the amount of rainfall and the amount of sunshine these areas receive. Most tropical rainforests fall between the Tropic of Cancer and the Tropic of Capricorn. These areas receive more sunlight and the amount of sunlight and intensity of the sunlight the tropics receive doesn't vary much in comparison to other parts of the globe.

Peru is a fascinating country. It has mountains, rainforests, coasts, and deserts (in fact, it has one of the driest deserts in the world). But another exciting aspect of Peru is dragons.

The Dragons of Peru | Answers in Genesis

Biodiversity is an important global issue. More than just 'I want my children to enjoy it', rich diversity allows medicines and foods to be naturally available. A healthy ecosystem maintains itself even with some natural disaster prevention mechanisms in most ecosystems. We also get various free services from the surrounding environment, which are not easily replaceable or replicable, so ...
