This esheet accompanies the lesson, Skin as an Organ. Introduction. Did you know that skin is the largest body organ? In this activity, you'll examine the skin and how it functions as an organ and as part of a larger body system.

### Skin as an Organ - Science NetLinks

The excretory system is a system of organs that removes waste products from the body. When cells in the body break down proteins (large molecules that are essential to the structure and functioning of all living cells), they produce wastes such as urea (a chemical compound of carbon, hydrogen, nitrogen, and oxygen).

Fight or flight – When a threat appears in the environment, the adrenal glands secrete adrenaline. In answer to this chemical message, the heart pumps blood faster, breathing deepens to take in more oxygen, and the nervous system sharpens perception and memory formation. Other changes also occur to make the body ready to fight or flee from a potential threat.
