We investigated a cluster of *Mycobacterium fortuitum* and *M. goodii* prosthetic joint surgical site infections occurring during 2010–2014. Cases were defined as culture-positive nontuberculous mycobacteria surgical site infections that had occurred within 1 year of joint replacement surgery performed on or after October 1, 2010.

Emerging Infectious Diseases journal - CDC

Overview. According to the Infectious Disease Society of America, “Infectious diseases rank as the second leading cause of death, over half of which are children under the age of 5. Infectious diseases are the third leading cause of death in the United States – 170,000 each year – a figure that has nearly doubled since the early 1980s.”

How to Become an Infectious Disease Specialist - Doctorly.org

Polio is a highly infectious disease caused by a virus. It invades the nervous system, and can cause total paralysis in a matter of hours. The virus is transmitted by person-to-person spread mainly through the faecal-oral route or, less frequently, by a common vehicle (for example, contaminated water or food) and multiplies in the intestine.

Poliomyelitis - who.int

Polio, or poliomyelitis, is a crippling and potentially deadly infectious disease. It is caused by the poliovirus. The virus spreads from person to person and can invade an infected person's brain and spinal cord, causing paralysis (can't move parts of the body).

Smallpox was an infectious disease caused by one of two virus variants, *Variola major* and *Variola minor*. The last naturally occurring case was diagnosed in October 1977 and the World Health Organization (WHO) certified the global eradication of the disease in 1980. The risk of death following contracting the disease was about 30%, with higher rates among babies.

Smallpox - Wikipedia

Morgellons (/ m ɔːr ' g ɛ l ə n z /) is the informal name of a self-diagnosed, unconfirmed skin condition in which individuals have sores that they believe contain some kind of fibers. Morgellons is poorly characterized but the general medical consensus is that it is a form of delusional parasitosis; the sores are the result of compulsive scratching, and the fibers, when analysed, turn ...

Morgellons - Wikipedia

Abstract. The critical nature of the microbiology laboratory in infectious disease diagnosis calls for a close, positive working relationship between the physician/advanced practice provider and the microbiologists who provide enormous value to the healthcare team.

Laboratory Diagnosis of Infectious Diseases - idsociety.org

Smallpox is an ancient disease caused by the variola virus. Early symptoms include high fever and fatigue. The virus then produces a characteristic rash, particularly on the face, arms and legs. The resulting spots become filled with clear fluid and later, pus, and then form a crust, which eventually dries up and falls off. Smallpox was fatal in up to 30% of cases.
