Emotions coordinate our behavior and physiological states during survival-salient events and pleasurable interactions. Even though we are often consciously aware of our current emotional state, such as anger or happiness, the mechanisms giving rise to these subjective sensations have remained unresolved. Here we used a topographical self-report tool to reveal that different emotional states ...

Write the most probable equation for the rate of reaction giving reason for your answer. Solution : From an examination of above data, it is clear that when the concentration of B 2 is doubled, the rate is doubled. Hence the order of reaction with respect to B 2 is one. Further when concentration of A is doubled, the rate remain unaltered.
