Plant floor design is the key to an efficient production environment. However, when laying out a new plant, changing the layout of an existing facility or adding a new assembly line, many engineers underestimate how many factors to consider. They only focus on equipment or material flow, instead of designing factories around lean principles, such as jidoka, kaizen and kanban.

During the first five decades of commercial aviation, aircraft design changed dramatically. However, that hasn't been the case over the last 50 years. Despite major developments in materials, the basic shape of commercial aircraft has remained relatively the same since the 1960s. Whether it's a business jet, a regional turboprop or a long-haul jetliner, most airplanes feature the same ...
