134 Phase Changes Answers

T1 reflects the length of time it takes for regrowth of Mz back toward its initial maximum value (Mo). Tissues with short T1's recover more quickly than those with long T1's. Their Mz values are larger, producing a stronger signal and brighter spot on the MR image. T2 reflects the length of time it takes for the MR signal to decay in the transverse plane.

Attempts at standardized temperature measurement prior to the 17th century were crude at best. For instance in 170 AD, physician Claudius Galenus mixed equal portions of ice and boiling water to create a "neutral" temperature standard. The modern scientific field has its origins in the works by Florentine scientists in the 1600s including Galileo constructing devices able to measure relative ...
