Our approach was based on a mixed quantitative and qualitative bibliometric content analysis of the available literature (), broadly following the approach of Newig and Fritsch (2009). The intention is to provide a broad overview of the state of the science, with a particular focus on the key challenges to undertaking transdisciplinary sustainability science.

### **A review of transdisciplinary research in sustainability ...**

Science in a broad sense existed before the modern era and in many historical civilizations. Modern science is distinct in its approach and successful in its results, so it now defines what science is in the strictest sense of the term. Science in its original sense was a word for a type of knowledge, rather than a specialized word for the pursuit of such knowledge. In particular, it was the ...
