Life cycle costing is different from traditional cost accounting system which reports cost object profitability on a calendar basis (i.e. monthly, quarterly and annually) whereas life cycle costing involves tracing costs and revenues of a cost object (i.e. product, project etc.) over several calendar periods (i.e. projected life of the cost object).

### **Life Cycle Costing: Meaning, Characteristics and ...**

Marginal costing is a method of cost accounting and decision-making used for internal reporting in which only marginal costs are charged to cost units and fixed costs are treated as a lump sum. It is also known as direct, variable, and contribution costing. In marginal costing, only variable costs are used to make decisions.
