Froguts has been around since 2001. Rick, David, and Joni have had the honor of providing this resource to learners around the world. As of January 1st, 2019, we are no longer able to sustain the company and support new subscribers while we also pursue our other careers in education, healthcare data science, and museology.

Froguts

In this post we will set up a virtual lab for malware analysis. We'll create an isolated virtual network separated from the host OS and from the Internet, in which we'll setup two victim virtual machines (Ubuntu and Windows 7) as well as an analysis server to mimic common Internet services like HTTP or DNS. Then, we'll be able to log and analyze the network communications of any Linux or ...
