### **Solving Right Triangles Using Trigonometry Examples**

If you want to round, the rounding always comes at the end. If you don't do this, you get rounding errors. Also, since the bottom one has only one significant digit, that means that your answer would actually be 10 cm, instead of 11.9 cm (which, if you're going off of all of the lengths and angles besides the bottom one, is still not rounded well.

The use of metric prefixes dates back to the inception of the French metric system, in 1793. It was originally decided that the submultiples of all basic units would be prefixed with a Latin root, corresponding to the decimal divisor (deci for 10, centi for 100, milli for 1000), whereas the decimal multiples would be prefixed with a Greek root, corresponding to the decimal multiplier (deca for ...
