*Use The Functions To Answer Question - Yeah, reviewing a books use the functions to answer question could be credited with your close connections listings. This is just one of the solutions for you to be successful. As understood, attainment does not recommend that you have fabulous points.*

*Comprehending as well as understanding even more than extra will have enough money each success. next to, the statement as capably as perspicacity of this use the functions to answer question can be taken as capably as picked to act.*

### **Use The Functions To Answer**

From C++, are min and max preferable over fmin and fmax? For comparing two integers, do they provide basically the same functionality? Do you tend to use one of these sets of functions or do you prefer to write your own (perhaps to improve efficiency, portability, flexibility, etc.)?

### **Use of min and max functions in C++ - Stack Overflow**

Bobby, The "this" you are inquiring about is referring to the window object, which is the global window object that all the code is defined on.. In the apply function, the first argument sets the use of the "this" keyword. So this line: f.apply(this, arguments); is saying: call the f function and use the window object as the this keyword inside the f function.

So is there a reason why these functions are static? Non-static member functions have a hidden additional parameter called this. Passing this doesn't come for free, so making a private function static can be seen as a means of optimization. But it can also be seen as a means of expressing your requirements/design in your code: If that function doesn't need to refer to any member data of the ...
