Observations occur when we can see something happening. In contrast, inferences are what we figure out based on an experience. Helping students understand when information is implied, or not directly stated, will improve their skill in drawing conclusions and making inferences. These skills will be needed for all sorts of school assignments, including reading, science and

Habitat Animal Printouts. The Earth has many different environments, varying in temperature, moisture, light, and many other factors. Each of these habitats has distinct life forms living in it, forming complex communities of interdependent organisms. A complex community of plants and animals in a region and a climate is called a biome.
