Cancer treatment with chemotherapy, radiation therapy, surgery, and biologic therapy puts patients at risk for development of infection. Compromised immune function associated with treatment can affect morbidity and mortality.

Prevention of Infection: General | ONS

Cancer-related fatigue has been defined as a distressing, persistent, and subjective sense of tiredness or exhaustion that is not proportional to activity and interferes with usual function. Fatigue is one of the most common problems in patients with cancer. It may be related to the disease itself or cancer treatment and may continue beyond completion of treatment among long-term cancer survivors.

A health savings account (HSA) is a tax-advantaged medical savings account available to taxpayers in the United States who are enrolled in a high-deductible health plan (HDHP). The funds contributed to an account are not subject to federal income tax at the time of deposit. Unlike a flexible spending account (FSA), HSA funds roll over and accumulate year to year if they are not spent. HSAs are ...

The U.S. health care delivery system has been changing dramatically during the past 40 years. Economic changes around the world and the passage of the Affordable Care Act of 2010, as well as the resulting political responses, have focused the country's attention on the need to revise the U.S. health care system to improve access and quality while reducing the delivery costs.

A: Section 317 of the Public Health Service Act authorizes the federal purchase of vaccines to vaccinate children, adolescents, and adults. Over its 50 year history, Section 317-purchased vaccine has been directed towards meeting the needs of priority populations; most recently this has included underinsured children not eligible for VFC, and uninsured adults.
