Best Answer: Quantum physics is the study at things at the quantum level. Im only a HS freshman so i dont know everything about it but ill try and explain the basics Max Plank first theorized that energy comes in undividable "packets" (each is $6.63 \cdot 10^{-34}$ J/s) max made this theory to deal with the ultraviolet catastrophe.

Quantum physics tries to explain the behavior of even smaller particles. These particles are things like electrons, protons, and neutrons. Quantum physics even describes the particles which make these particles! That's right; the model of an atom that you were taught in high-school is wrong.

In quantum physics, the Heisenberg uncertainty principle states that locating a particle in a small region of space makes the momentum of the particle uncertain; and conversely, that measuring the momentum of a particle precisely makes the position uncertain. In quantum mechanics, the particle is described by a wave.
