A circle is the set of points in a plane that are equidistant from a given point O. The distance r from the center is called the radius, and the point O is called the center. Twice the radius is known as the diameter $d=2r$. The angle a circle subtends from its center is a full angle, equal to 360 degrees or 2π radians. A circle has the maximum possible area for a given perimeter, and the ...
