How to fix error 400 from Visual Basic in Excel - Quora

I am having a problem adding an application manifest to a Visual Basic .net project. The suggestions I have found tell me to right-click the project icon in solution explorer, select Add New, and select the Application manifest icon.

Add an application manifest to a vb.net project in Visual ...

Microsoft Excel is a spreadsheet developed by Microsoft for Windows, macOS, Android and iOS. It features calculation, graphing tools, pivot tables, and a macro programming language called Visual Basic for Applications. It has been a very widely applied spreadsheet for these platforms, especially since version 5 in 1993, and it has replaced Lotus 1-2-3 as the industry standard for spreadsheets.

Microsoft Excel - Wikipedia
