The physiologic changes that occur in ventilation during sleep contribute to nocturnal oxygen desaturation in those with lung disease. Nocturnal supplemental oxygen is often used as therapy, although convincing data exist only for those who are hypoxemic both during sleep and wake. Ongoing trials may help address whether oxygen should be used in those with only desaturation during sleep.

Supplemental Oxygen Needs During Sleep. Who Benefits ...

Organ Systems 1. Respiratory System - Allows gas exchange between cells and the environment. Includes trachea and lungs. Respiratory System Function. The respiratory system takes oxygen from the environment and converts it into a form that cells can use.. In humans, that means that our lungs take in oxygen, and rapidly diffuse it into the blood.The lungs accomplish this by passing large ...
