Self-organization, also called (in the social sciences) spontaneous order, is a process where some form of overall order arises from local interactions between parts of an initially disordered system. The process can be spontaneous when sufficient energy is available, not needing control by any external agent. It is often triggered by random fluctuations, amplified by positive feedback.

If repairing the catalog doesn't help, repeat the steps above, but instead of clicking Repair, click New to create a new test catalog. If you're able to import photos into the new catalog and the Organizer works correctly, then there's likely something about the old catalog that is corrupted in some other way. In that case, try recreating the Organizer's thumbnails.
