Intersex people are individuals born with any of several variations in sex characteristics including chromosomes, gonads, sex hormones, or genitals that, according to the UN Office of the High Commissioner for Human Rights, "do not fit the typical definitions for male or female bodies". Such variations may involve genital ambiguity, and combinations of chromosomal genotype and sexual phenotype ...

In common usage, the word "human" generally refers to the only extant species of the genus Homo—anatomically and behaviorally modern Homo sapiens.. In scientific terms, the meanings of "hominid" and "hominin" have changed during the recent decades with advances in the discovery and study of the fossil ancestors of modern humans. The previously clear boundary between humans and apes has ...

Studies of the Chediak-Higashi syndrome (CHS; 214500) led to identification and characterization of the LYST gene. In 'beige' mice, the murine equivalent of Chediak-Higashi syndrome, Perou et al. (1996) succeeded in identifying the 'beige' gene by in vitro complementation and positional cloning, and confirmed its identification by defining mutations in 2 independent mutant alleles.

Unique for its role in human reproduction, a gamete is a specialized sex cell carrying 23 chromosomes—one half the number in body cells. At fertilization, the chromosomes in one male gamete, called a sperm (or spermatozoon), combine with the chromosomes in one female gamete, called an oocyte. The function of the male reproductive system is to produce sperm and transfer them to the female ...

A major aspect of the debate over abortion concerns the use of terminology. In keeping with Just Facts' Standards of Credibility, this research uses language that is clear and precise. Thus, expressions such as "pro-life" and "pro-choice" are replaced by words that describe specific positions.

Abortion - Just Facts

ENDNOTES. 1 I first proposed and defended the interaction approach for humans in the 1960s. At this time it was generally believed that orientation and identity were solely products of the environment and upbringing (Diamond 1965, 1968, 1995b). Since then I have presented this view many times from different perspectives; see the References for details.
