I wonder if so many women would “choose” hysterectomy if they knew how it would affect their figure and internal anatomy. I know I would have told my once respected gynecologist “no way” and left never to return if I’d known just a smidgen of what I now know. Here are some of the anatomical and skeletal changes that occur post hysterectomy.

The goal of exercise is to break the body down. Yes, you read that correctly. Looking back at our evolutionary biological roots, when we put our bodies through difficult situations, we wanted them to adapt—maybe to go for longer without food, maybe so we could detect a smell that told us certain berries were poisonous, maybe to jump higher to reach fruit in a tree.
