FORCES . A force is any push or pull that causes an object to move, stop, or change speed or direction.; The greater the force, the greater the change in motion will be. The more massive an object, the less effect a given force will have on the object.; Unless acted on by a force, objects in motion tend to stay in motion and objects at rest remain at rest.

We walked up the narrow stairs and my heart was pounding. I'd never been to a sex club before. A place where people can have sex and other people can watch. And it was all quite hilarious and exciting when we were on the street, trying to find the discreet, nondescript door. But shit was getting ...

It is not often that deep or interesting mathematics shows up in literary works. The Curious Incident of the Dog in the Night-time is not only a truly remarkable debut for its author, but it is also succeeds amazingly well at interweaving mathematics and mathematical modes of thought into a gripping storyline that is surprisingly passionate in its relentlessly analytical tone.
