HBD Chick once discussed this study. What I find interesting (besides the over all correlation) is the overall pattern. Note that the high-scorers cluster towards the northern part of the country while the low-scorers generally cluster closer to the south. Some of that is due to greater diversity in the southern part of the country, but it's not just that.

Property, in the abstract, is what belongs to or with something, whether as an attribute or as a component of said thing. In the context of this article, it is one or more components (rather than attributes), whether physical or incorporeal, of a person's estate; or so belonging to, as in being owned by, a person or jointly a group of people or a legal entity like a corporation or even a society.
